Comments: The UAA was conducted in July, 2005, and no WBCR was observed at the two sites evaluated. The stream did not meet the average or maximum depth criteria at either site. Site #2 is approximately 1.5 miles upstream from the mouth of the stream. Sand Branch enters the stream downstream of site #2. There is not enough information for the committee to make a recommendation on the WBCR designation. The committee recommends obtaining additional data downstream of the confluence with Sand Branch.
